

everybody hates chris
Second Season

This show is all about Chris Rock growing up in the 80's
As a kid,
he is nerd that is ousted by everybody especially the ladies.
But Chris perseveres and lives through his adolescent tragedies
Because in the future they would birth many of his comedies.
What works the best is the flash-alternatives and voiceovers
Whit and wisdom so valued like a cell phone plan with minutes that rollover.
According to the bonus feature doc, the cast pulled out all the stops,
But unfortunately,
the second season did not live up to the usual genius of Chris Rock.
Season one was amazing because it was so fresh and new
But it seems like the writers were so successful that they did not know what to do.
Next season Chris will be in high school
I hope they up-grade his character so he does not always play the fool.
If there is a possibility that he could win big or lose big
Each episode will be more real and something I could really dig.

Grade =B-
